

Material

- nature paper, nature white, 120 g/m²
- glue on natural basis

Seeds

- germination in product > 80%
- durability of the used seeds about 1 year
- seeds are GMO-free

Function

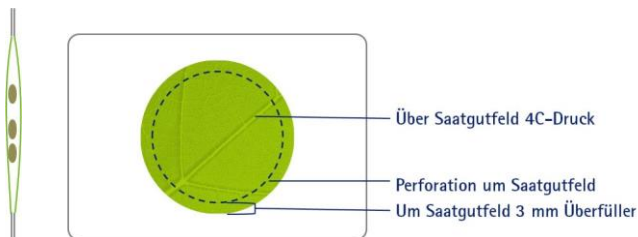

Simply separate out the perforated seed area, tear it in half, plant it 1 cm deep in the earth, keep it moist for a few days and the first seedlings will start to appear.

Print data

- best directly over the seeds, so that the seed does not shine through
- no fine writing directly over the seeds
- Please note the tolerance of 2 mm!

note recommendation for the design: always refer to seed

Production

- existing cutters can be used, please contact us!
- individual cutters and free forms are possible, we are happy to consult you!
- minimum size: 35 x 35 mm
- minimum order quantity (500 Ex.)

note a "seed aid perforation" reduce the germinating time by 1 week. This is very important for children's products!

Personalization options

- digital printing (also image personalization possible), laser or inkjet

Timing

- 3-4 weeks after print release

note

- response increase of 15-20 %
- natural product with high involvement
- gimmick in postcard mailing (no enveloping etc.)
